## Revised IFRS Standards

All changes resulting from the so-called "Improvements Project" of the IASB that are relevant to Schindler have been applied since January 1, 2005. One effect of this is that consolidated net profit and consolidated shareholders' equity are now reported inclusive of minority interests. Also, the restatement results in reclassifications in the balance sheet and profit and loss statement. These reclassifications have no material effect on the consolidated net profit or consolidated shareholders' equity. The main changes are described in the "Notes to the consolidated interim financial statements", pages 10 and 11. The comparative values from the previous year have been adjusted accordingly.

# Pleasing growth and increased net profit

The Schindler Group achieved pleasing growth in the first half of 2005 and recorded a 10.8% increase in net profit to CHF 164 million; its best-ever half-year result. In the elevators and escalators business orders received, operating revenue and operating profit developed positively. ALSO gained market share despite subdued demand.

## Orders received and order backlog

Consolidated orders received rose 4.2% to CHF 4 399 million compared to the first half of 2004. This corresponds to an increase of 5.3% in local currencies.

The elevators and escalators business posted a 3.4% rise in orders received to CHF 3 480 million (+4.6% in local currencies). The subdued level of orders received at the beginning of the year was followed by a sharp acceleration of growth in the last few months. Asia, Eastern Europe, the Middle East and North and South America reported strong levels of orders received, while some European markets stagnated.

The order backlog in the elevators and escalators business increased 23.4% to CHF 4 562 million as at June 30, 2005. In local currencies, the order backlog rose 14.4%. This growth was mainly attributable to a strong level of orders received in the second quarter of 2005.

## Highlights in the elevators and escalators business

In May, Schindler opened the world's largest escalator production plant in Shanghai, China. The manufacturing site is designed for a maximum production capacity of 6 000 escalators per year.

A complete range of innovative new elevator systems was launched in Barcelona in June, marking the renewal of Schindler's entire product portfolio for residential properties and smaller commercial buildings in Europe. At the same time, Schindler introduced the first standardized product line for freight elevators and special elevators, as well as a modernization and replacement program.

**1 CBX Tower: 10 Schindler 700 high-rise elevators equipped with the Miconic 10 hall call destination control system and Schindler/ID access control system, plus three further elevators; Paris, France**

1

Schindler won further orders for notable projects in the high-rise segment during the first six months of the year. In Madrid, 32 high-rise elevators are to be installed in the Torre Espacio and Torre Sacyr y Vallehermoso. In the prestigious Bahrain Financial Harbour, which includes the Bahrain Stock Exchange, the various mobility requirements will be met by 28 high-rise elevators, 12 passenger elevators and 20 escalators. In Shanghai, Schindler also succeeded in securing the order for the second tower of the impressive Plaza 66 business complex and is installing 17 high-rise elevators. Moreover, Schindler will already commence delivery of the major order for 156 Schindler 9300 escalators for the Grand Indonesia shopping center in Jakarta in the fall of this year.

### Operating revenue

Consolidated operating revenue increased 5.0% to CHF 4 099 million. This corresponds to growth of 5.9% in local currencies.

2

The elevators and escalators business recorded a 3.9% rise in operating revenue to CHF 3 190 million (+5.1% in local currencies). The markets in Asia, Eastern Europe and Latin America contributed overproportionally to this expansion.

ALSO was confronted with weak levels of demand in both the IT market and the consumer electronics sector in the first half of 2005. In spite of this, it succeeded in increasing its consolidated net sales by 8.5% to CHF 909 million.

In addition to the continued – and partly even increased – pressure on prices, other factors reduced the margin. First, it was not possible in all markets to fully offset the rise in raw materials prices through price increases. Second, the operating result was impacted by a labor dispute with the unionized employees in the New York region. The dispute, which affected almost all major elevator companies, was resolved at the end of June following a 14-week work stoppage.

### Operating result for the elevators and escalators business

The elevators and escalators business reported a 16.8% increase in operating profit (EBIT) to CHF 292 million in the period under review (first half of 2004: CHF 250 million), representing its best result to date. The EBIT margin improved from 8.1% to 9.2%.

This improved margin was achieved through ongoing productivity gains and cost-reduction measures. In addition, the new IFRS rule – under which the goodwill amortization is no longer applied – had a positive impact of CHF 15 million on operating profit compared to the previous year.

2 **New Milan Exhibition Center: 73 elevators and 91 Schindler 9300 escalators; Italy  
Photo: Schlaich Bergermann and Partner, Stuttgart**

1

### **Operating result for ALSO**

In ALSO, operating profit of CHF 9 million was below the result for the same period of last year (CHF 15 million) due to pressure on margins. This result includes a provision of

**1 ALSO logistics center;  
Emmen, Switzerland**

CHF 3 million, which was recorded due to a legal dispute with a supplier. At present, it can be assumed that no additional costs will arise.

### **Group net income from financing and investing**

Net income from financing and investing amounted to CHF –32 million (first half of 2004: CHF –31 million). While net interest expense decreased, foreign exchange losses on operational hedging transactions increased due to the strengthening of the US dollar versus the Swiss franc in particular.

### **Net profit and cash flow**

Net profit increased 10.8% to CHF 164 million (first half of 2004: CHF 148 million). Cash flow rose 12.6% to CHF 215 million (first half of 2004: CHF 191 million), reflecting the pleasing improvement in profit.

### **Personnel numbers**

Personnel increased by 369 employees or 0.9% to 39 812 employees versus the end of 2004. In the elevators and escalators business, personnel increased by 397 employees – primarily in the Eastern European and Asian growth markets. In ALSO, personnel decreased by 28 employees or 4.7%.

### **EU antitrust investigation**

As already announced on several occasions, the European Commission initiated investigations into the elevator and escalator industry regarding suspected pan-European collusions in January 2004. Based

on the results of Schindler's own internal investigations, it has to be assumed that isolated infringements had occurred in a small number of EU countries in the past. No indications of pan-European infringements were found. The anticipated report by the European Commission, outlining the areas of complaint, is likely to be presented in the second half of 2005.

As previously stated, the class-action lawsuits filed in the USA following the announcement of the EU investigation were rejected by the responsible judge in New York due to a lack of evidence. In July 2005, a group of the previous plaintiffs filed a new class-action lawsuit, which once again collectively accused the international elevator industry of having structures and practices that violated antitrust legislation. We consider this lawsuit to be completely without legal foundation. We are therefore optimistic that it will likewise be rejected.

An estimation of any financial implications of the EU proceedings cannot be made on the basis of the information available to us. Consequently, no provisions were recorded in the reporting period.

**2 Opening ceremony of the world's biggest escalator factory; Shanghai, China**

#### Outlook for 2005

Overall, Schindler expects growth to continue in 2005, with the exception of certain countries in southern Europe.

Thanks to its newly launched product range in Europe, as well as its global efficiency gains, Schindler is confident it can successfully master the constant challenges. The situation regarding raw materials prices has eased slightly and should have a positive impact on the second half of the year. However, the anticipated improvements in performance will be negatively impacted by the continued strong pressure on prices.

ALSO expects to report net income of between CHF 15 million and CHF 17 million for the current year, assuming that the second half of 2005 displays the usual seasonal trends.

Based on this assessment, and excluding any unforeseeable events, we expect a pleasing increase in net profit for 2005.

Alfred N. Schindler

# Notes to the consolidated interim financial statements

## General principles

The accounting principles applied in these unaudited interim financial statements as at June 30, 2005, fulfill the requirements of the IFRS (International Financial Reporting Standards), particularly the International Accounting Standard (IAS 34) "Interim Financial Reporting".

## Methods of recognition and valuation

Schindler has applied the same principles of recognition and valuation in its interim financial statements as it did in the preparation of its consolidated 2004 financial statements, with the exception of the revisions set out below.

All of the changes arising from the IASB "Improvements Project" that are relevant to Schindler have been applied with effect from January 1, 2005.

IFRS 2 "Share-based Payment" has no material impact as the corresponding expenses relating to employee compensation were already reported as an expense in prior periods.

IFRS 3 "Business Combinations" has been applied to all acquisitions with an agreement date on or after March 31, 2004. According to this standard, intangible assets which result from either a contractual or legal right, or which can be separated from the business and whose market value can reliably be determined, are deducted from goodwill (=paid added value) and reported separately as intangible assets. The remaining goodwill is no longer amortized but is subject to an annual impairment test.

Capitalized goodwill arising from earlier business combinations has only been handled according to IFRS 3 with effect from the reporting year 2005. In line with this new regulation, the planned amortizations have not been applied, thus eliminating a charge of CHF 15 million from the interim results as at June 30, 2005, compared to the same period of the previous year.

Based on IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations", the corresponding positions from the Systems Business Division, which was sold by ALSO on February 5, 2004, were reclassified in the profit and loss statement of the previous year. This resulted in a CHF 5 million impact at operating revenue level. Expenses also amounted to a total of CHF 5 million, thus producing a balanced result at the level of the "Result from discontinued operations".

For financing purposes, the ALSO Group sold accounts receivable from supplies and services to an independent bank. The receivables sold were previously deducted directly from the accounts receivable portfolio. As a result of the new regulations, these receivables are no longer deducted from the accounts receivable portfolio. Accordingly, the preliminary financing is reported as a liability. The balance sheet as at December 31, 2004, has been adjusted retroactively by CHF 50 million.

Book profits and losses from the sale of fixed assets are no longer included under depreciation and amortization. Instead, they are deducted as "Other income" under "Operating expenses".

The remaining adjustments relate primarily to reclassifications in the balance sheet and have no material impact on consolidated shareholders' equity. The corresponding reclassifications were also made in the comparative periods.

The interim financial statements, which were drawn up on the basis of IFRS, contain assumptions and estimates which affect the figures shown in this interim report. The true results may differ from these estimates.

**Scope of consolidation**

The scope of consolidation as at June 30, 2005, has been expanded versus June 30, 2004, to include several small companies of minor significance whose impact on consolidated operating revenue and consolidated operating profit is less than 1%.

**Translation of foreign currency**

The exchange rates of the foreign currencies that are relevant for the Schindler Group are set out in the table below.

**Debentures**

Debentures remained unchanged versus December 31, 2004, and comprised:

- 3½% debenture 1999–2009, nominal value CHF 300 million
- 4½% debenture 1999–2006, nominal value CHF 300 million

**Income tax**

Income tax expense is recorded in the interim financial statements on the basis of the best possible current estimate of the income tax rate for 2005.

**Dividends**

In accordance with the decision of the General Meeting of March 21, 2005, a dividend of CHF 7.00 (previous year: CHF 6.00) per registered share and per bearer participation certificate for the reporting year 2004 was distributed on March 24, 2005.

**Contingent liabilities**

There have been no significant changes in contingent liabilities versus December 31, 2004.

**Release of the interim financial statements for publication**

These interim financial statements as at June 30, 2005, were approved by the Board of Directors on August 17, 2005, and released for publication.

**Events after the balance sheet date**

No significant events have occurred since the balance sheet date.

**Currency exchange rates**
